## PROFESSIONAL EXPERIENCE

### QA Engineer

**Newscape Consulting LLP  |  Sep-2021 to Present**

**Project - HealthRules Payer | Client - HealthEdge**

**Description:** HealthRules Payer (HRP) is a JAVA based cutting-edge core health insurance administrative platform developed by HealthEdge. The application encompasses three user interfaces: HealthRules Manager, HealthRules Designer, and HealthRules Admin. This application revolutionizes the health insurance industry

with its advanced features including automated claims processing and seamless integration of financial, administrative, and clinical functions.

**Responsibilities:**

- Analyze the issue and understand each requirement end to end and prepare required documents like Test Plan, Test Design to cover end to end scenario's , edge/corner cases.

- Utilized TestRail to organize and manage test cases, ensuring each test scenario is thoroughly documented, including steps, expected outcomes, and actual results.

- Test environment setup and test data creation

- Test case writing & execution, UI, integration, functional, regression testing, API testing, monitor regression after code merge, ensuring new code integrations do not adversely affect existing functionalities.

- Collaborated with the development team during bug fixes, re- testing failed cases, and verifying successful defect resolution

- Database testing, upgrade, performance testing, API testing.

- Test evidence document creation, conducted acceptance demos for clients, showcasing the application's functionality.

- Bug logging and tracking through JIRA

- Played a pivotal role in validating integration tests (ITs) and providing inputs for release notes, ensuring accurate and informative documentation.

- Experience and knowledge in SDLC , STLC , testing methodology, agile model , scrum development practices ,client communication ,healthcare domain ,health insurance. Worked on different types of features .Worked closely with client , Tech leads, PO.
